

4371**M. B. B. S. Examination, 2010****(Second Professional)****GENERAL PATHOLOGY****Paper - I**

Time : Three Hours] [Maximum Marks : 40

Note :- Attempt all questions.

1. Define inflammation. Write in detail about acute inflammation. 10
2. Write in short about :
 - (a) Congestion and Hyperaemia. 5
 - (b) Thrombosis and Embolism. 5
3. Write notes on :
 - (a) Necrosis 5

[P. T. O.

100

- | |
|-------------------------------------|
| (b) PAP's Smear. 5 |
| (c) Shock. 5 |
| (d) Chronic Granulomatous Lesion. 5 |

GENERAL PATHOLOGY

Paper - I

Time : Three Hours]

[Maximum Marks : 40

Note :- Attempt all questions.

1. What changes occur in a cell during necrosis?
Classify and define necrosis. Give one example of each type. 10
2. Write differences between :
 - (a) Humoral and cellular immunity. 5
 - (b) Tuberculosis and sarcoidosis. 5

[P. T. O.

SYSTEMIC PATHOLOGY

Paper - II

Time : Three Hours]

[Maximum Marks : 40

1. Define leukemia. Give 'FAB' classification of acute leukemia and draw a well labelled diagram of acute myeloid leukemia.
2. Write differences between (any two only) :
 - (a) Obstructive and hemolytic jaundice. 5
 - (b) Nephritic and nephrotic syndrome. 5
 - (c) Pyogenic and tubercular meningitis CSF findings. 5

[P. T. O.

3. Write in short :

- | | |
|---|----|
| (a) Atherosclerosis - pathogenesis. | 5 |
| (b) Bronchiectasis - pathology. | 5 |
| 4. Write in very brief about Hodgkin's lymphoma and its subtypes. | 10 |

(Second Professional)

PATHOLOGY

Paper - I

Time : Three Hours]

[Maximum Marks : 40

Note :- Attempt all questions. Answer to Part I and II
should be written in separate answer books.
Attempt part of a question in sequence.

PART - I

1. Differentiate between : 8
- (a) Hyperplasia and hypertrophy.
 - (b) Lepromatous and tuberculoid leprosy.
 - (c) Acute and Chronic ITP.
 - (d) Exudate and transudate.

[P. T. O.

4371-A

2

2. Comment briefly on :

- (a) Down's syndrome
- (b) Lab. diagnosis of hemophilia
- (c) Chemical mediators in inflammation

3. Write briefly on :

- (a) Mechanism of fatty change in liver.
- (b) Mechanism of anaphylactic shock.

PART - II

4. Write short notes on :

6

- (a) Hodgkin's disease.
- (b) β_2 microglobulin in multiple myeloma.

5. Write briefly on :

8

- (a) Mechanism of amyloid deposition
- (b) Spread of tumours
- (c) Peripheral blood findings in beta-thalassemia major
- (d) Hypercholesterolemia and its significance

3

4371-A

8

6. Write short notes on :

- (a) Acute radiation injury

- (b) Osteomalacia

- (c) Free radical induced injury

PATHOLOGY-I

Time : Three Hours] [Maximum Marks : 40

Note :- Attempt all questions.

PART - I

1. Differentiate between : 8
 - (a) Coagulation necrosis and caseous necrosis.
 - (b) Exudate and transudate.
2. Comment briefly on : 6
 - (a) Pathogenesis of renal edema.
 - (b) Mechanism of autoimmune disease.

PART - II

3. Give the laboratory diagnosis of : 6
 - (a) Megaloblastic anaemia
 - (b) ITP

[P. T. O.

4. Write short notes on :

- (a) Indications of bone marrow aspiration.
- (b) Laboratory anticoagulants.

PART - III

5. Write briefly on : 8
 - (a) Blood transfusion reactions.
 - (b) Paraneoplastic syndromes.
 - (c) Pathogenesis of endotoxic shock.
 - (d) Chemical types of amyloid.
6. Write short notes on : 6
 - (a) Cardiac edema
 - (b) Dry gangrene

M. B. B. S. Examination, 2012

(Second Professional)

PATHOLOGY-II

Time : Three Hours] [Maximum Marks : 40

Note :- Attempt all questions.

PART - I

1. Differentiate between : 8

- (a) Post necrotic and alcoholic cirrhosis.
- (b) Nephroblastoma and hypernephroma.

2. Comment briefly on : 6

- (a) Complications of infective endocarditis.
- (b) Histological types of bronchogenic carcinoma.

PART - II

3. Give pathogenesis of : 6

- (a) Ulcerative colitis.
- (b) Membrano proliferative glomerulo-nephritis.

200

[P. T. O.

4. Give gross and microscopic features of : 6

- (a) Mucinous cystadenoma of ovary
- (b) Osteogenic sarcoma.

PART - III

5. Write short notes on : 8

- (a) Carcinoid appendix
- (b) Pleomorphic adenoma

6. Comment on : 6

- (a) Fibroadenoma breast
- (b) Ghon's complex

III

(2)

Q. 2. Describe peripheral blood and bone marrow findings in macrocytic anemia. 10

Q. 3. Describe the following : 5x4=20

- (a) Caseation necrosis
- (b) Dry gangrene
- (c) Giant cells
- (d) Prostaglandins

5508

MBBS 2nd Professional

Examination, 2013

PATHOLOGY-I

Paper : I

Time Allowed : Three Hours

Maximum Marks : 40

Note : Attempt all questions.

Q. 1. Write short notes on the following : 2x5=10

- (a) Paradoxical embolism
- (b) Trisomy disorders

5508

P.T.O.

5508

400

(2)

Q. 4. Write about the following :

$2 \times 5 = 10$

- (a) Pathogenesis of peptic ulcer
- (b) Hepatocellular jaundice

5509

**MBBS 2nd Professional
Examination, 2013**

PATHOLOGY-II

Paper : II

Time Allowed : Three Hours

Maximum Marks : 40

Note : Attempt all questions.

- | | |
|--|----|
| Q. 1. Describe the etiopathogenesis and pathology of rheumatic fever. | 10 |
| Q. 2. Discuss the etiopathogenesis, pathology and complications of bronchiectasis. | 10 |
| Q. 3. Classify nephritis. Describe the laboratory findings in nephrotic syndrome. | 10 |
